Disclaimer

I build **highly** monitored Hello World
apps

Code

<https://github.com/xeraa/microservice-monitoring>

APPLICATION

Simple

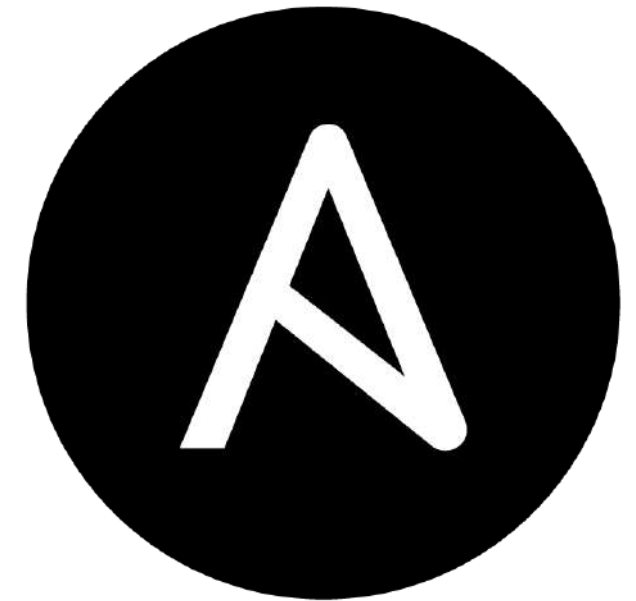

No discovery, load-balancing,...

IF ALL YOUR APIS HAVE SHORT NAMES,

THEN YOU HAVE MICROSERVICES

The background of the entire image is a high-angle, aerial view of a vast sky filled with numerous white, puffy cumulus clouds. A brilliant sun, positioned in the upper right corner, casts a powerful, golden light across the scene, creating long, dramatic rays that fan out across the sky and illuminate the clouds from below. The overall color palette is dominated by warm, golden-yellow and orange tones, with the white of the clouds providing a stark contrast.

pressure

Disk usage 0 MB of 2 GB

☐ Stop routing

A low-angle, upward-looking shot of a white security camera mounted on a ceiling. The ceiling features a grid of fluorescent light fixtures, with one light glowing brightly. The camera is positioned in the center-right of the frame, pointing towards the viewer. The overall lighting is dim, with the primary light source being the overhead fluorescent lights.

MONITORING

Metricbeat: System

Packetbeat

<https://xeraa.wtf>

Metricbeat: nginx

Filebeat Modules

Filebeat + JSON

MDC, context, stack hash

A photograph of two greyhounds running on a sandy beach. The dog on the left is a brindle greyhound, and the dog on the right is a solid dark greyhound. Both dogs are captured in mid-stride, with their mouths open and sand kicked up around their paws. The background is a soft-focus view of the ocean and a cloudy sky.

Heartbeat

Metricbeat: HTTP

ID	Description	Sensitive Default
<code>actuator</code>	Provides a hypermedia-based “discovery page” for the other endpoints. Requires Spring HATEOAS to be on the classpath.	true
<code>autoconfig</code>	Displays an auto-configuration report showing all auto-configuration candidates and the reason why they ‘were’ or ‘were not’ applied.	true
<code>beans</code>	Displays a complete list of all the Spring beans in your application.	true
<code>configprops</code>	Displays a collated list of all <code>@ConfigurationProperties</code> .	true
<code>dump</code>	Performs a thread dump.	true
<code>env</code>	Exposes properties from Spring’s <code>ConfigurableEnvironment</code> .	true
<code>flyway</code>	Shows any Flyway database migrations that have been applied.	true
<code>health</code>	Shows application health information (when the application is secure, a simple ‘status’ when accessed over an unauthenticated connection or full message details when authenticated).	false
<code>info</code>	Displays arbitrary application info.	false
<code>liquibase</code>	Shows any Liquibase database migrations that have been applied.	true
<code>metrics</code>	Shows ‘metrics’ information for the current application.	true
<code>mappings</code>	Displays a collated list of all <code>@RequestMapping</code> paths.	true
<code>shutdown</code>	Allows the application to be gracefully shutdown (not enabled by default).	true
<code>trace</code>	Displays trace information (by default the last few HTTP requests).	true

Metricbeat: Jolokia

Time Series Visual Builder & Annotations

A photograph of a chain-link fence with a rusty metal post. A padlock is attached to the fence. The background is a blurred outdoor scene.
